COMMENTS OF THE CONSUMER ELECTRONICS GROUP
OF THE ELECTRONIC INDUSTRIES ASSOCIATION

The Consumer Electronics Group of the Electronic Industries Association ("EIA/CEG") hereby comments on the Petition for Notice of Inquiry filed by the Association of Maximum Service Telecasters, the National Association of Broadcasters, the Association of Independent Television Stations, and 55 other broadcast organizations (hereinafter collectively referred to as "Petitioners"). EIA/CEG unequivocally supports the Petitioners' request that the Commission initiate a proceeding to review the status of advanced television technologies and their impact on local television broadcasting.

As EIA/CEG noted in its comments in support of the Petitioners' Petition for Special Relief,¹ it is important

¹/ See Comments of the Consumer Electronics Group of the Electronic Industries Association, Gen. Docket No. 85-172 (Mar. 16, 1987).

015

that the Commission acquire a deeper understanding of developments in advanced television technologies. This is an area of very active innovation, and the Commission needs to develop a record that will permit it to identify and resolve any regulatory implications that may inhere in the technology developments. For example, as we have previously observed, progress in advanced television systems may be highly relevant to the Commission's pending UHF-land mobile proceeding.²

We will not burden the Commission with a recital of the many reasons why an inquiry should be promptly initiated. Nor will we suggest any specific topic areas that should be included in the inquiry. For present purposes, EIA/CEG wishes only to lend its support to the Petitioners' request that an advanced television systems inquiry be initiated, so that information which may be
